Major clinical and research engagements

Mauro Ceroni has been visiting scientist at the NINDS Of the NIH of Bethesda, USA, working in the Nobel Price Gadjusek laboratory in the field of prion diseases in the eighties. When he came back from the States, he established an experimental neurobiology Laboratory at the Neurological foundation Mondino of Pavia. Since late nineties, he started to get involved in studying ALS from the clinical and the laboratory

research point of view. As recent publications show he is deeply involved in the clinical follow-up of patients, in clinical research of the various aspects of the disease, in biological research especially dedicated to the study of peripheral blood cells as a model of the neurological damage. He is chief of the general neurologic department at Mondino Foundation; Neurology Associate Professor at the University of Pavia giving classes in Master in Neurobiology and Biotechnology and Harvey medical school in English in Pavia.

He is the author of 256 peer reviewed scientific papers published on the major international journals, coauthor with Faustino Savoldi and Luca Vanzago of the book “La coscienza”, Editor ARAS, pp 1087, November 2013 and with Prof G Bellini of the book “Dall’atomo all’io”, Hoepli Scientific Collection, Milan, 2015
